

Anti-HSP90 β Mouse Monoclonal Antibody(H2)

Catalog No.	EM42063-01	EM42063-02
Size	50 μ l	100 μ l
Species	Human Mouse Rat	Molecular 90KD

Background: Hsp90 (heat shock protein 90) is a chaperone protein that assists other proteins to fold properly, stabilizes proteins against heat stress, and aids in protein degradation. In mammalian cells, there are two or more genes encoding cytosolic Hsp90 homologues, with the human Hsp90 α showing 85% sequence identity to Hsp90 β .

Specificity: Antibody can detect endogenous HSP90 α protein.

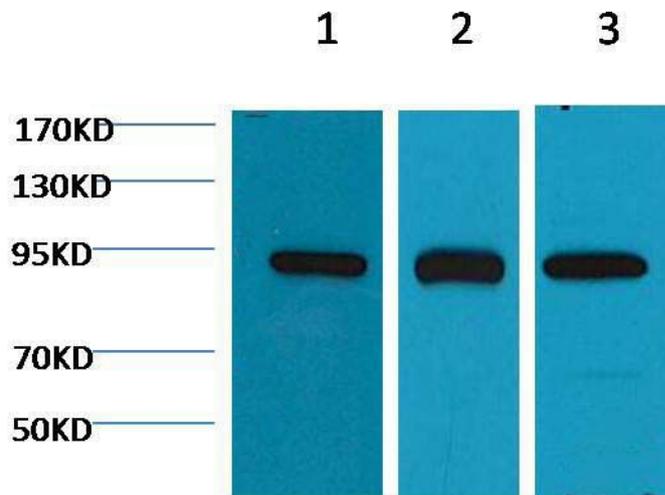

Application: WB 1:1000-3000

Optimal dilutions/concentrations should be determined by the end user.

Form: Liquid, 1mg/ml

Storage buffer: PBS, pH 7.4, containing 0.02% sodium azide as Preservative and 50% Glycerol.

Storage: Store at -20°C. Do not aliquot the antibody.

Western blot analysis of 1) HeLa, 2) Mouse Brain tissue, 3) Rat Brain tissue with Hsp90 β mAb diluted at 1:2,000.
