

Anti-c-Myc Tag Mouse Monoclonal Antibody-HRP conjugated

Catalog No.	EM33103-01	EM33103-02
Size	50µl	100µl

c-Myc-tag antibody is part of the Tag series of antibodies, the best quality in the research. Myc protein is a transcription factor that activates expression of a great number of genes through binding on consensus sequences (Enhancer Box sequences (E-boxes)) and recruiting histone acetyltransferases (HATs). A recent study demonstrated that temporary inhibition of Myc selectively kills mouse lung cancer cells, making it a potential cancer drug target.

Molecular Weight: N/A

Application : WB 1:1,000-3,000 Optimal dilutions should be determined by the end user.

Specificity:The C-Myc tag antibody can detect C-Myc fusion proteins.

Form: Liquid ,1mg/ml

Storage buffer: PBS, pH 7.4, containing 0.02% sodium azide as Preservative and 50% Glycerol

Storage: Store at -20°C. Do not aliquot the antibody.

Western blot analysis of c-Myc Recombinant protein with cMyc mAb diluted at 1:2,000.
