

Anti-HA Tag Mouse Monoclonal Antibody(Mix)

Catalog No.	EM33201-01	EM33201-02
Size	50μl	100μl

Human influenza hemagglutinin (HA) is a surface glycoprotein required for the infectivity of the human virus. The HA tag is derived from the HA-molecule corresponding to amino acids 98-106 has been extensively used as a general epitope tag in expression vectors. Many recombinant proteins have been engineered to express the HA tag, which does not appear to interfere with the bioactivity or the biodistribution of the recombinant protein. HA tag antibody is a highly sensitive and affinity monoclonal antibody applicable to HA-tagged fusion protein detection.

Molecular Weight: N/A

Application : WB 1:5,000-10,000 IP 1:200 IF 1:200 Optimal dilutions should be determined by the end user.

Specificity: The HA tag antibody can recognize C-terminal, internal, and N-terminal HA-tag fusion proteins.

Form: Liquid ,1mg/ml

Storage buffer: PBS, pH 7.4, containing 0.02% sodium azide as Preservative and 50% Glycerol

Storage: Store at -20°C. Do not aliquot the antibody.

Western blot analysis of His-MBP-HA recombinant protein with HA mAb diluted at 1:10,000.
