

Anti-Histone H3 (di methyl K79) Mouse Monoclonal Antibody(H7)

Catalog No.	EM42030-01	EM42030-02
Size	50µl	100µl
Species	Human Mouse Rat	Molecular 15KD

Background: Histone H3 is one of the five main histone proteins involved in the structure of chromatin in eukaryotic cells. Core component of nucleosome. Nucleosomes wrap and compact DNA into chromatin, limiting DNA accessibility to the cellular machineries which require DNA as a template. Histones thereby play a central role in transcription regulation, DNA repair, DNA replication and chromosomal stability.

Specificity: Antibody can detects endogenous Histone H3 (di methyl K79) protein.

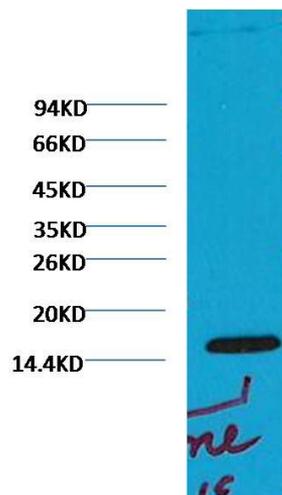

Application: WB: 1:500-2,000

Optimal dilutions/concentrations should be determined by the end user.

Form: Liquid ,1mg/ml

Storage buffer: PBS, pH 7.4, containing 0.02% **sodium azide** as Preservative and 50% Glycerol.

Storage: Store at -20°C. Do not aliquot the antibody.

Western blot analysis of 293T with Histone H3 (di methyl K79) Mouse mAb diluted at 1:2,000
